Introduction

Serving Sizer™ is a calculator for multiplying and estimating recipe ingredients. It converts recipe ingredients to alternative serving sizes and proportions. It also converts US weights and measures (cups, pints, lbs, etc...) to and from Metric system equivalents (ml, grams, etc...). Supports PalmOS® 2.0 and higher (including 5.0).

PalmOS and HotSync are registered trademarks of Palm, Inc. Palm is a trademark of Palm, Inc. Windows is a trademark of Microsoft Corp. Macintosh is a registered trademark of Apple Computer, Inc. Linux is a registered trademark of Linus Torvalds. RedHat is a registered trademark of RedHat, Inc. All other trademarks are the property of their respective owners.

Software License

The very first time that you launch the program, the License Agreement screen will appear. Before using the software, you must read, understand, and agree to the software license. The software license is available online and is included in the software package downloaded from the Creative Algorithms website.

Trial Period

The program may be evaluated for 30 days from the date of installation. After which, you must purchase a registration key to unlock the program and continue using it. Every time the program is launched, you will be shown the number of evaluation days remaining. This display will not appear once the program is registered.

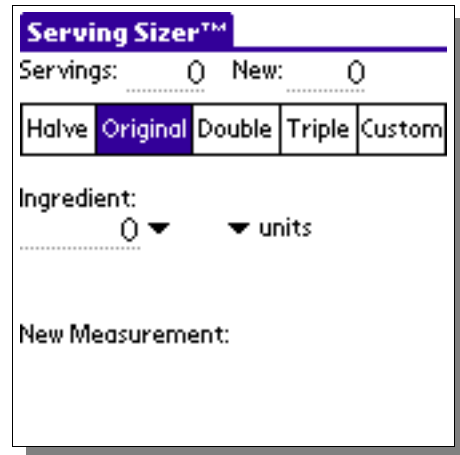

Using Serving Sizer™

When you launch the program, you will see the main screen:

The top of the screen are two serving-size fields. The first is the serving size specified in your recipe. The second is the serving size you want.

The multiplier pushbuttons (“Halve”, “Original”, “Double”, “Triple”, and “Custom”) below the serving-size fields allow you to quickly change the “New” servings field with some common multiples of the recipe serving size.

The screenshot shows the 'Serving Sizer™' application window. At the top, there's a title bar with the text 'Serving Sizer™'. Below the title bar, there are two input fields: 'Servings:' followed by a text box containing '0', and 'New:' followed by a text box containing '0'. Below these fields is a row of five buttons: 'Halve', 'Original' (which is highlighted with a blue background), 'Double', 'Triple', and 'Custom'. Below the buttons, there is a label 'Ingredient:' followed by a text box containing '0' and a dropdown arrow, and then the word 'units' with another dropdown arrow. At the bottom of the window, there is a label 'New Measurement:' followed by a large empty text box for the result.

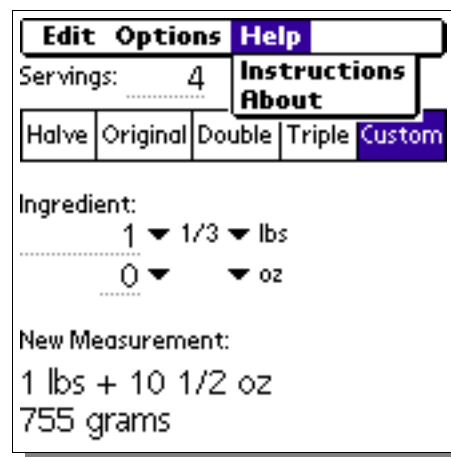

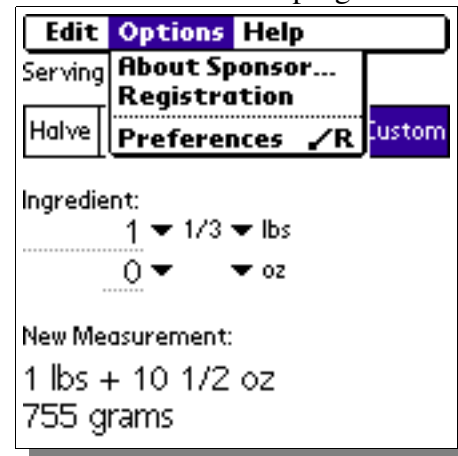

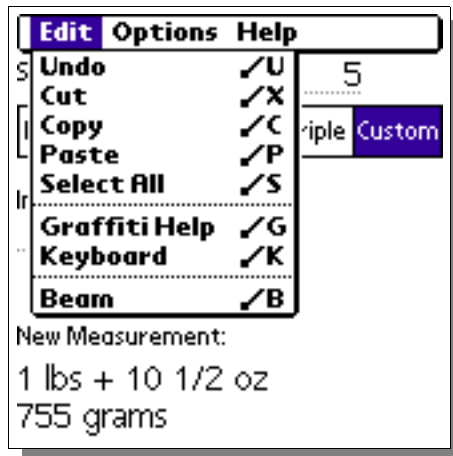

Next is the ingredient area. Enter the value of an ingredient from your recipe. If your recipe calls for a fractional measurement, you can use the fraction pop-up list to select a fractional amount. Next, select the units for the ingredient measurement using the units pop-up list. If you have selected a unit for which there are sub-units (pounds, for example, may include ounces), then a secondary measurement area will appear. If your recipe uses sub-measurements instead of fractional measurements, you can complete the secondary field below the main ingredient field. Otherwise, just leave it empty.

The new ingredient measurement appears at the bottom of the screen and takes into account standard measuring spoon sizes. For instance, if your recipe serves six and calls for one tablespoon of an ingredient and you want to convert the recipe to serve two (thus dividing the recipe by three), then the new measurement will be one teaspoon instead of 1/3 tablespoon. Furthermore, if the same recipe calls for one teaspoon, the new measurement will be 1/4 teaspoon instead of 1/3 teaspoon since measuring spoons don't come in 1/3 teaspoon size. This is rarely an issue, but you should be aware that some rounding-off is unavoidable.

The new measurement value is displayed in both US and metric units (by default). This can be changed with the “Preferences” drop-down menu item.

Drop-down Menu Items

These screen shots illustrate the drop-down menu items accessible from the program:

Undo/Cut/Copy/Paste/SelectAll/Keyboard/Graffiti Help:

Performs the selected action on the active field.

Beam:

Beams the program to other user's via the infrared port. See the "Sharing the Program" section for more information.

About Sponsor...:

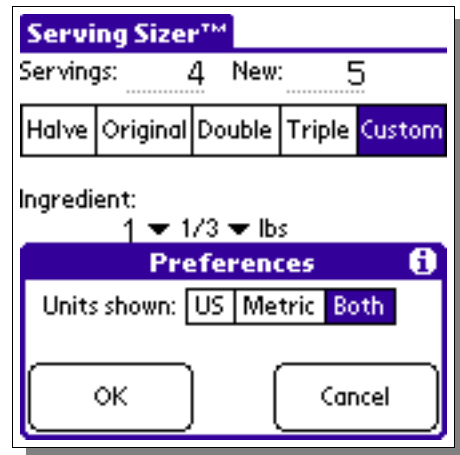

Displays information about the program's sponsor.

Registration...:

If registered, this displays information about to whom the program is registered. Otherwise, it displays instructions for registering the program and accepting the registration key.

Preferences...:

Shows the preferences screen that allows changes to the program's behavior. The “US”, “Metric”, and “Both” pushbuttons select the system of units used to displaying the new ingredients.

Instructions...:

Shows quick tips for using the program.

About...:

Displays the program version.

Registering

Registration keys may be purchased on-line at:
<http://www.handango.com>.

To begin the registration process, Launch the program. If the program has already expired, you will see the registration screen automatically. Otherwise, you will need to tap the menu button and select the “Registration...” menu item from the “Options” drop-down menu. The “Registration Instructions” screen will appear.

Note your PDA HotSync® user name displayed at the bottom. You will need to enter your user name exactly when purchasing and registering the program. Tap the “Done” button and then the “Cancel” button.

Open the following URL in your Internet browser:
<http://www.handango.com>.

Then add the program to your shopping cart. Follow the instructions for checking out. Be careful to enter your PDA HotSync® user name exactly when checking out. Otherwise, the registration key will not work. After your payment has been confirmed, your registration key will be emailed to you.

Once you have your registration key, launch the program. If the program has already expired, you will see the registration screen automatically. Otherwise, you will need to select “Registration...” from the drop-down menu.

Tap the “Done” button. The registration key entry screen will appear. Enter the code that was emailed to you. Be careful to enter the code exactly as it appears in the email. Tap the “OK” button when you are finished. If you have entered the code correctly you will see the confirmation screen. The program is now unlocked and registered to you.

A screenshot of a PDA registration screen. The screen has a purple header bar with the word "Registration" in white. Below the header, the text "Enter your registration code below:" is displayed in bold. A large text input field is in the center, containing the text "abc123". At the bottom of the screen, there are two buttons: "OK" on the left and "Cancel" on the right.

Sharing the Program

You can share the program with another Palm user either by “beaming” the program to them or by emailing it to them. You may not, however, share any registration key codes or coupon codes with them.

Beaming the Program

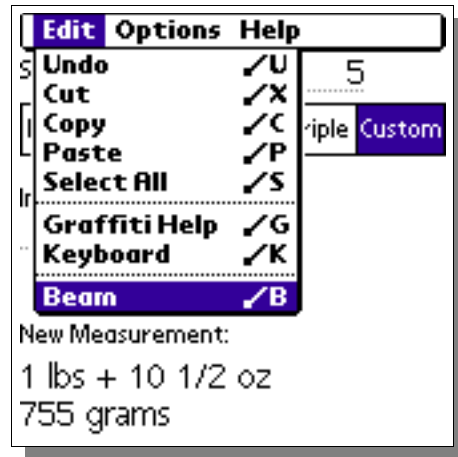

Press the “APPLICATIONS” button on the Palm™ device. The application launcher screen should appear. Tap the menu button to activate the drop-down menu. Select the “Beam” menu item.

Then, select the program from the list of available programs. Follow the manufacturer's instructions for beaming programs.

You can also beam the program while it is running by selecting the “Beam ...” menu item from the drop-down menu:

Emailing the Program

The best way to email the program is to email a link to the program. Copy the following link and paste it into your email:

<http://www.creativealgorithms.com/servingsizer.html>.
