Introduction

Stamp Pdf Server program will help to number the pages in various PDF documents, also to mark pages with any text or image. Application may be used both on server and on single workstation, doesn't require an Acrobat Reader installation and supports PDF 1.7 protocol.

Stamp Pdf Server is easy to use: program control is realized by using only a few parameters of command line.

Stamp Pdf Server application uses unique optimization algorithms what helps to reduce size of output PDF file appreciably.

Stamp Pdf Server allows marking pages in following modes:

- start marking from any page or any number;
- add prefix text, separator text, postfix text;
- mark pages with images - jpeg files;
- 2 up processing;
- a/b 2 up processing;
- nth processing;
- number the pages in reverse order;
- number only single page.

Due to use of specific solutions Stamp Pdf Server application allows to mark the pages in PDF files 50 times quicker than Acrobat Reader.

Registration

Stamp Pdf Server can be purchased through a secure site, to order please click a link below:

<http://www.pdfeasyutils.com/index.php?id=39>

NOTE: 1 license is required per installation and platform.

For workstation usage, all prices are \$39 US Dollars per license; please click order links for volume prices.

For server usage, all prices are \$295 US Dollars per license; please click order links for volume prices.

All licenses include free updates to 1.XX and 24/7 email supports.

This will ensure future development on this product as Our Team have spent many hours of development and wish to continue development in the future.

Once ordered you will be given instructions on how to activate the product.

Features

Supports all versions OS Windows

Automates the process of stamping PDF files

Command Line options for automation

Doesn't require Acrobat

What's New?

v1.1

1/11/2008 Algorithms of work are optimized and the size of the program is reduced.

Extract the StampPdfServer.zip to your hard drive.

Open the folder StampPdfServer and go to Examples folder.

Run the test example.bat to test it's working.

Getting Start

Stamp Pdf Server version 1.1
web site: <http://www.pdfeasyutils.com>
email: support@pdfeasyutils.com
Unregistered copy.

Usage:

StampPdfSrv [mode] in.pdf out.pdf [params]

[mode] - image for image stamping, text for text stamping

possible params:

- s(n) page to start processing at, default at 1
- e(n) page to end processing at, default at 99999
- n(n) only page number 1 in nth> e.g. -n2 would page number pages 1,3,5,7 with page numbers 1,3,5,7, default 0
- flipv flips vertical positions so 20,20 would be top left calculated from top of page.
- fliph flips horizontal positions so 20,20 would be bottom right from right edge of page.
- force force portrait when landscape, if view is rotated then calculate as unrotated.
- pos(n),(n) h,v (horizontal, vertical) positions on page calculated from bottom left up. e.g. 20,20 would be bottom left corner. use 10,20 as default. if -1 is specified then center on page size.
- align <TEXT> align justified text, can be 'left', 'right' or 'center', left is default. e.g. right on positions 20,20 would mean last character right edge ends at that position.

for text stamping only:

- ns(n) page number to start at, default at 1
- ne(n) page number to end at, default at 99999
- m(n) mask number with n zeros e.g. -m5 would create number 00001, e.g. page 00001 of 00010, default mask 0
- seq sequential numbering for -n(n), e.g. e.g. -n2 -seq would page number pages 1,3,5,7 with page numbers 1,2,3,4, default 0
- r reverse page numbers first page would be last page number, last page would be first page number.

- 2up 2 up page numbering e.g. 10 page doc, page 1 would be 1, page 2 would be 6, page 3 would be 2, page 3 would be 7.
- ab2 A/B 2 up page numbering e.g. 10 page doc, page 1 would be 1, page 2
- one one page number text only, e.g. by default page number 1 / 2, 2 / 2 so one would be just 1 then 2
- rom roman numerals numbering lower case e.g. xii
- ROM roman numerals numbering in upper case, e.g. XII
- npg no page numbers just text
- prefix <TEXT> text to prefix page number with e.g. 'Page ' e.g. for Page 1 / 2, set default to 'Page '
- sep <TEXT> text to separate page number start and end with, e.g. ' / ' for e.g. 1 / 2, set default to ' / '
- end <TEXT> text to end with, e.g. ' Pages' for e.g. 1 of 2 Pages, no default i.e. "
- font <TEXT> font name to use, e.g. Arial, use Arial as default
- color RGB hex font color to use in rgb hex. 000000 is default for black. default as black.
- size(n) font size to use, e.g. 11, use 11 as default
- angle(n) angle of text in degrees, use 0 as default

for image stamping only:

- size(n),(n) image size viewed in pdf, the image viewed can be different to the jpeg image size.
- opacity(n) opacity of the image in percent (transparency), e.g. 1-100, default - opacity100
