

PipisCrew.Text_Comparer

Application can compare two lists and find the unique missing lines for each other. User can drag&drop a file to grids or use the paste buttons. When the grid filled can proceed with the **Compare Grids** button, program compare the lines and on the middle grids will show the **unique** differences. Information on every grid when filled up, shown to the labels are near of each grid. The buttons **remove duplicates** remove the duplicates from corresponding grid.

User is able to export any grid by selecting rows (use CTRL+A to select all rows) then copy&paste to any program (using CTRL+C > Open Notepad > CTRL+V).

Extra functionality given by **vlookup operation**, user enters to a new form, where again by drag&drop a file to grids, load the files. The purpose of this is to **match** the same data on user defined column from gridA to gridB and '*bring*' the needed column value to gridA.

Text_Comparer v1.0.0.0

Match Column : Patient vlookup

100

Patient	City
Seth	Dole
