

UltraMarks

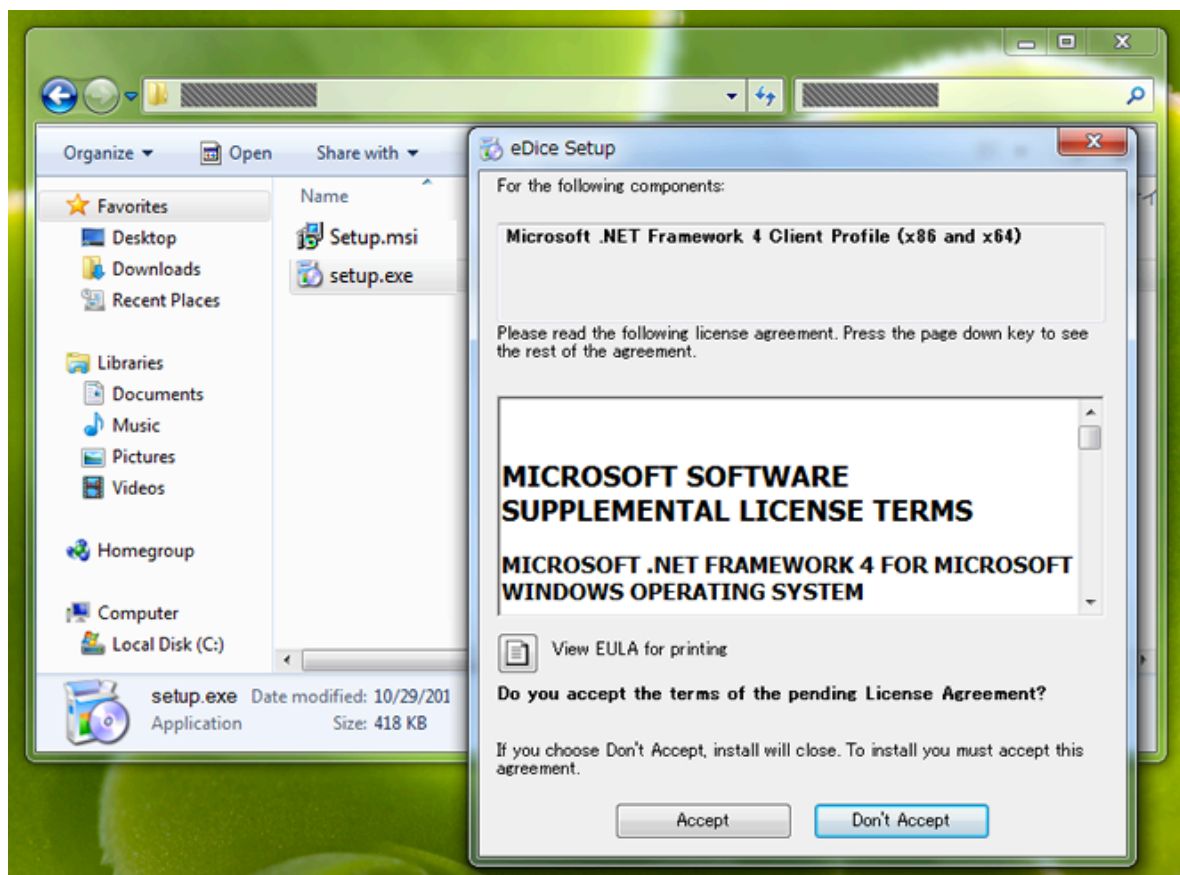

Thank you for your using UltraMarks.

1. Introduction

UltraMarks is a Windows application that lets the user batch-watermark any number of image files quickly and easily. UltraMarks is text-based. So you can set your watermark text in any way you want. It supports not just text styles like underline and strikethrough but also shadow text. Anyway, when you are ready, just choose File > Export to produce watermarked images.

2. Installing UltraMarks

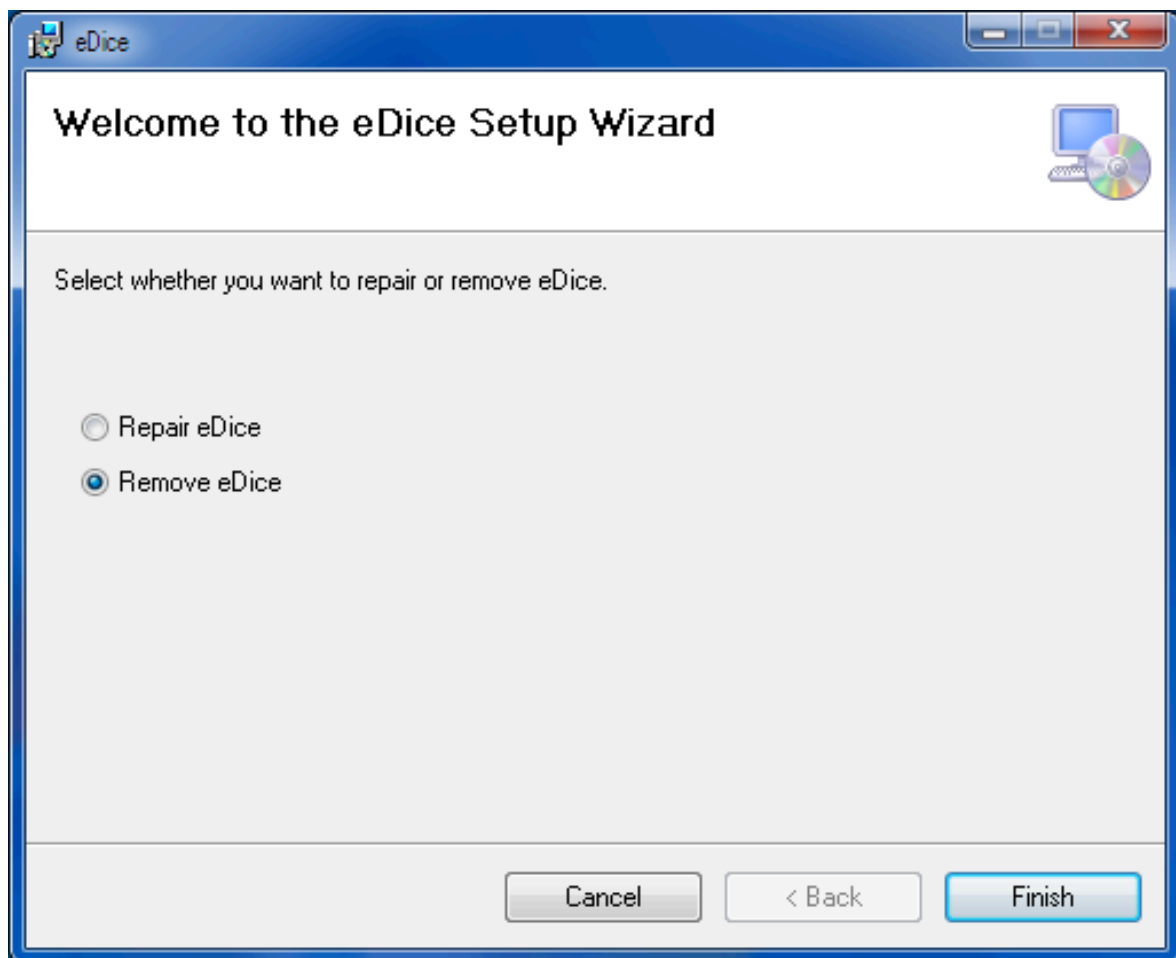

Double-click on **setup.exe** in the delivery package initiate the installation process. If your computer doesn't have it yet, UltraMarks will first attempt to install **.NET Framework 4**, and you will be prompted for confirmation. (See Screenshot 2.) Then you will proceed to install UltraMarks. You can use **Setup.msi** to install the application as long as you already have .NET Framework 4, which UltraMarks requires. You can find the application at the following path: C:\Program Files\MacHouse\UltraMarks.

3. Uninstalling UltraMarks

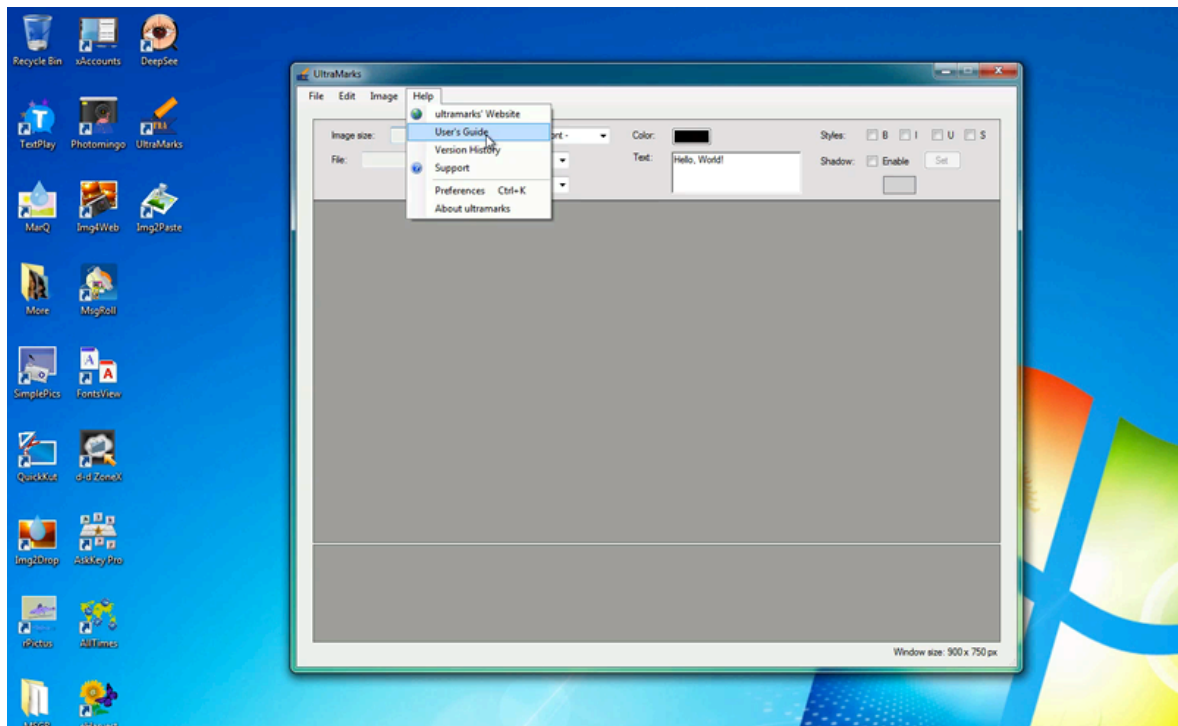

Open Control Panel and choose Uninstall a program. Then double-click on UltraMarks to initiate the uninstalling process. (See Screenshot 3.) You can also use the original setup.exe or setup.msi to uninstall the application. (See Screenshot 4.) Additionally, when it starts up for the first time, the application will create a folder, which you need to manually trash. You can locate it easily by opening Preferences and navigate to the System tab.
