Instructions :

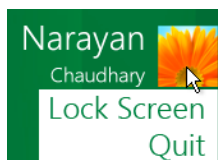

There are hidden effects and tricks below which will help you understand the app better

1) Lets start from 'Start'

Click on 'Start' for quick navigation towards start and end of panel

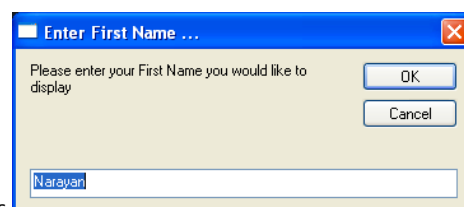

2) User Menu

a) Clicking on User icon gives you 2 options to Lock Screen or Quit

b) Change Names by clicking on names

3) Tooltip

- a) Hovering over a tile or text for sometime will give you tooltip

- b) Remember whenever you see this Text Select cursor means you can edit / configure / start it

4) Shortcuts

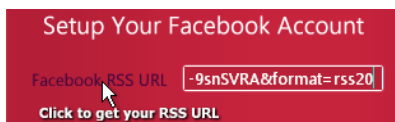

- a) This is a file shortcut you can change it by clicking on icon. Same Text cursor as above

- b) This is a folder shortcut you can change folder by clicking on icon

5) Socialite aka Facebook tile

- a) To get Facebook Notifications click on "Facebook RSS URL"
This will open browser window for notifications

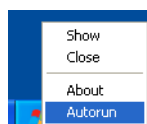

- b) Now as seen here Copy Link Address of your personal RSS feed and paste as shown above. Note : It will end with =rss20

6) Desktop Tile & Tray icon

- a) Clicking Desktop tile minimizes your app to a tray icon and shows Desktop

- b) With tray icon you can toggle Show / Hide status. You can also have Start with Windows

7) Lock Screen

As seen you can drag upper portion of screen a little bit to downwards and Lock Screen will appear

8) Amazon - Unbelievable lowest prices and highest discounts

We have partnered with amazon to bring you best of all amazon discounts
Click on this amazon icon or amazon tile in the app to pay less and get most out of it

9) Updating and Sharing

To check for an update click on this button and keep pointer there only
Depending on updates it will show "No Updates" or "Update Available"

I don't want a donation but if you really feel for donating just share this app with your friends. Click on this button now or in app and Show Us your Love which will be donation for me

These are few of many features of this app but shown as they are hidden effects
So explore and enjoy Windows 8 experience !
