

# VIVA THEMES

We Help You Look Good

## REPOUSSE THEME INSTRUCTION MANUAL

Thank you for purchasing this theme. This is your first step towards having a great looking site. Please read the instructions below. If you need more help please use our [support forum](#)

If you like this theme you might consider switching to the ALL THEMES PACKAGE. Please [click here for details](#)

## THEME OVERVIEW

Repousse is a very clean business theme created with the user in mind. You can build a great looking website very easily and quickly using this theme.

- Theme compatible with latest Wordpress version
- Post thumbnail feature.
- Custom menu system, multi-level dropdown
- Background customization panel.
- Theme options panel.
- Front page slider.
- Custom shortcodes
- Blog page template
- Two widget ready locations
- Threaded comments.
- Integrated blog pagination.
- CSS & XHTML valid.
- Cross-browser compatible.
- Delivered with .png source files (.psd files available in the forum)

## HOW TO INSTALL THE THEME

Please unzip the '[repousse\\_unzip\\_first.zip](#)' file that you received.

The theme is the '[repousse.zip](#)' file inside the folder. In your WordPress administration area, go to '[Appearance - Themes](#)'. In the top there appears a new tab navigation. Click on the '[Install Themes](#)' tab, then click the '[Upload](#)' item in the new menu and browse for the '[repousse.zip](#)' file in your computer and after locating it press the '[Install Now](#)' button and after that '[activate](#)' the new theme.

You can also install this theme the traditional way, by unzipping the '[repousse.zip](#)' file, and upload the theme folder using an ftp client to the '[wp-content/themes](#)' folder of your WordPress installation.

After installing the theme, go to '[Appearance-Themes](#)' in your WordPress administrator area, and click the '[activate](#)' link of the newly installed theme. The theme is now the active one.

## THE THEME OPTIONS PANEL

This theme comes with an options panel that allows you to configure some aspects of the theme without touching code. To access the options panel, in your WordPress administration area go to '[Appearance – Repousse Options](#)'. Please take a look at the different options you have there.

## CHANGING THE LOGO

You can change the logo from the theme panel, by changing the 'Logo Image Url' with your new logo image url.

You can also switch to text logo from the theme panel. In this case your 'Site Title' will replace the logo.

## CONFIGURING THE MENU

The theme uses in full the custom menu navigation system introduced in WordPress 3.0. There are two menu location in this theme: the 'Main Menu' & the 'Footer Menu'.

You need to go to 'Appearance – Menus' in your WordPress admin to start configuring your menu. You first need to create a menu in the right side and then from the left you can select the pages and categories you want to be part of each menu. Don't forget to click 'Save Menu' after you add the items. *Note that you have to have created your pages and categories first and they will be available in the list to include in the menu.*

In the left you will see the active menu location and you need to assign the new menu to the location using the dropdown selection.

To enable dropdown in the menu interface, you have to drag the menu items below another menu item (child item).

If you still have difficulties you can watch this tutorial

## USING THE THUMBNAIL FUNCTION

When you edit a post or a page, in the bottom of the right column you have a new area called *Featured Image*. Click on the [Set Featured Image](#) link and you will be taken in the image uploader interface, where you can upload or select one of the existing images. Make sure that after you view your image press the '[Use as Featured Image](#)' link. The image will be resized and cropped to fit your thumbnail size. The thumbnail is visible only in the category view. It will not be visible when viewing the full post. You can add the full sized image directly to your post if you want to.

## THE FRONT PAGE SLIDER

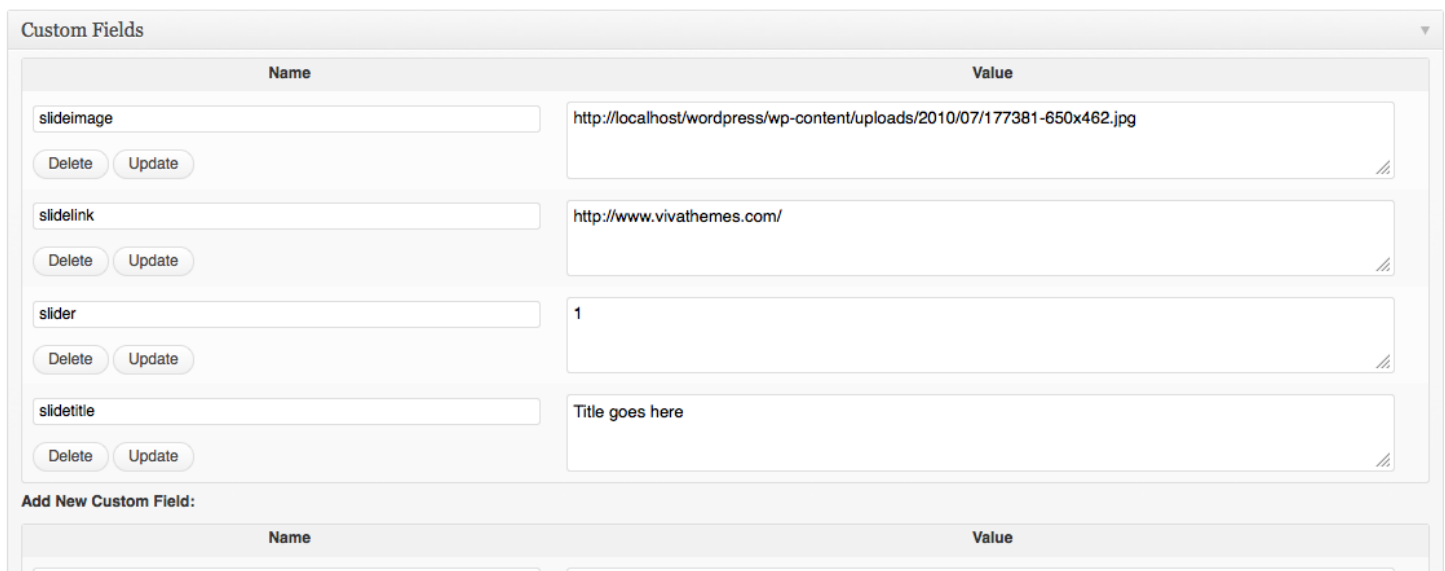

You can include any page or post in the slider, by simply creating a custom field in the page/post. The custom field name should be '[slider](#)' and the value should be '[1](#)'. Custom fields area is located in the bottom of the screen when you edit a page/post. If the custom fields section is not visible, you need to enable it in the 'Screen Options', top right corner when you edit a page or post.

When you include a page/post to the slider, by default the featured image will be used, the title of the page/post will be the title of the slide and the slide will link to the page/post.

If you don't want the page title to be used as the slide's title, you can create a custom field name '[slidetitle](#)' and in the value field enter the title you want.

If you want to use a different image, not the featured one, create a custom field named '[slideimage](#)' and in the value field enter the url of the image you want to use. Note that if you use the featured image, it will be resized automatically. If you decide to use the '[slideimage](#)' field, the image should be exactly 425x182px.

If you don't want the slide to link to the page/post, you can create another custom field named '[slidelink](#)' and in the value area enter the url to be linked to. Please check the screenshot below for an example of the custom fields used.

The screenshot shows the 'Custom Fields' meta-box in WordPress. It contains a table with two columns: 'Name' and 'Value'. There are four rows of custom fields, each with a 'Delete' and 'Update' button. The fields are: 'slideimage' with value 'http://localhost/wordpress/wp-content/uploads/2010/07/177381-650x462.jpg', 'slidelink' with value 'http://www.vivathemes.com/', 'slider' with value '1', and 'slidetitle' with value 'Title goes here'. Below the table is a section for 'Add New Custom Field:' with empty input fields for Name and Value.

Name	Value
slideimage	http://localhost/wordpress/wp-content/uploads/2010/07/177381-650x462.jpg
slidelink	http://www.vivathemes.com/
slider	1
slidetitle	Title goes here

Add New Custom Field:

Name	Value

## THE WIDGET AREAS OF THE THEME

This theme has 4 widget ready areas. The [FRONT BOTTOM BAR](#) is the widget in the bottom of the front page, below the content. The [RIGHT SIDEBAR](#) is the right bar visible in all pages. You can add widgets to each area by going into '[Appearance – Widgets](#)' in your WordPress administration area and dragging & dropping widgets into each bar. Note that you can add as many widgets as you want to each area.

## SETTING UP THE BLOG

The theme comes with a blog page template. You need to create a page, and in the template selection in the right, select 'Blog Page', and include this page in the menu.

Alternatively you can include categories in the menu.

## CUSTOM BACKGROUND PANEL

One of the new features introduced is the custom background that enables you to easily change the background color of your website or upload an image as your background.

To do so, in your WordPress admin go to 'Appearance – Background' and there you can easily make the necessary changes.

## USING SHORTCODES

Shortcodes are custom styled elements ready for you to use. You can use them in your posts, pages or text widgets. To check out our shortcodes please see here:

[http://demo.vivathemes.com/themes/artcouture/?page\\_id=51](http://demo.vivathemes.com/themes/artcouture/?page_id=51)
