/isdownloaded 1 0	if isdownloaded 1: only searches for already downloaded updates if 0: only searches for not yet downloaded updates	—	✓

WSUS Options		Free	Pro
<code>/bypass_wsus</code>	switches WSUS off before executing WuInstall and on again afterwards	—	✓
<code>/use_wsus wsus_address</code>	changes WSUS to the specified <code>wsus_address</code> while executing WuInstall, and sets everything to the initial WSUS configuration state afterwards	—	✓
<code>/use_mu_on_error</code>	when an error occurs trying to install an update using WSUS, WuInstall automatically tries again to install the updates bypassing the WSUS	—	✓

Other Options		Free	Pro
<code>/autoaccepteula</code>	automatically accepts EULAs for all updates	—	✓
<code>/logfile file-to-log</code>	logs the console output of WuInstall to the specified logfile	—	✓
<code>/logfile_append file-to-log</code>	similar to <code>/logfile</code> but the entries are appended at the end of the specified file, instead of creating a new file	—	✓
<code>/maxruntime minutes</code>	starts a timer and exits within the specified number of minutes	—	✓
<code>/simple_error</code>	WuInstall returns 0 for any success / 1 for any error, regardless of the reason	—	✓
<code>/show_progress</code>	shows the progress for the download and installation of every single update	—	✓
<code>/offline</code>	WuInstall is not connecting to WSUS or Microsoft Update site when searching updates	—	✓
<code>/quiet</code>	update-installer is forced to do an installation without user interaction	—	✓
<code>/disableprompt</code>	disable showing source prompts to a user when installing the updates	—	✓
<code>/silent</code>	suppresses any console output (logfile option is still working)	—	✓
<code>/donothing [retcode]</code>	WuInstall takes no action and returns the specified retcode, 0 by default	—	✓
<code>/xmlout file</code>	writes an XML report to the specified file	—	✓
<code>/disable_winhttp_proxy</code>	disables the winhttp Proxy	—	✓
<code>/disable_internet_proxy</code>	disables the internet Proxy, after executing WuInstall the winhttp Proxy is enabled again	—	✓
<code>/includRecommendedUpdates</code>	includes recommended and optional updates	—	✓
<code>/disable_ie_firstruncustomize</code>	disables the internet explorer 8 set up dialog	—	✓
